VISION

Promote sustainable development and social justice through

Dialogue and
Data Transparency

MISSION

Providing an interactive ecosystem based on data science, allowing all stakeholders within and outside the value chain to participate:

1

Promoting Corporate Social Responsibility (CSR), Corporate Shared Value (CSV), Environment, Society and Governance (ESG), Social Impact and Sustainability in business.

2

Strengthening connection, dialogue, training, support and monitoring activities through digital systems.

3

Creating a sustainable development community, expert network, sharing experiences and knowledge on a fair and transparent information platform.

Core Principles of
SUSTAINABLE DEVELOPMENT

CSR TECH JSC provides advanced tools and systems to support businesses in implementing and effectively managing the following principles, helping to enhance transparency, accountability and sustainable development.

CSR TECH JSC CSR TECH JSC is a pioneer in providing software solutions to help businesses implement and monitor sustainable development indicators. The **"Core Principles"** of **Sustainable Development** include:

1 — Engagement & Dialogue

2 — Ownership

3 — Capacity Building & Learning

3 — Accountability – Self-Reporting

5 — Systems & Compliances

6 — Effective Grievance

7 — Information historical & Data driven

About the Core Principles of
SUSTAINABLE DEVELOPMENT

Engagement and Dialogue

Get involves internal employee and external stakeholders into an open and fairness social dialogue. This will ensure transparency and promote mutual understanding between all parties.

Ownership

Conduct proactive self-assessment and improvement to identify areas for improvement. Focus on remediation and progress reporting, ensuring continuous improvement over time.

Capacity Building and Learning

Increase awareness by promoting self-learning and online learning opportunities. This will support continuous skill improvement and personal development.

Accountability – Self-Reporting

Self-reporting with a focus on transparency, monitoring and accountability. These principles are critical to ensuring that the sustainability goals are implemented effectively and ethically.

Systems and Compliances

Complying with regulations and good practices in labor and environmental management will help your organization's systems stay stable and ensure that legal requirements are met as your organization grows.

Effective Grievance

Resolving complaints promptly and transparently helps your organization maintain employee and customer satisfaction, creating a sustainable work and business environment.

Information historical and Data driven

Systematically manage operations, data logs, user behavior, and data insights, helping organizations gain an overview of operations, promptly detect problems, and make accurate strategic decisions.

02 Ownership

Businesses can conduct online surveys to listen to employees' opinions and feedback on their satisfaction with their working conditions and environment.

Extracting data from these surveys helps businesses have a more intuitive view of the results of business development activities.

ASSESSMENT MANAGEMENT SYSTEM (AMS)

The multi-dimensional monitoring and evaluation system allows multiple parties to participate in the process of monitoring and evaluating labor compliance, assessing and testing the capacity of workers, suppliers, production chains, and supply chains *(from employees, managers, business owners, monitoring organizations, assessors, inspectors, and third parties).*

Additionally, promoting enterprise self-monitoring and assessment is the premise of responsible business practices and sustainable compliance monitoring.

CSR Ecosystem

The CSR ecosystem helps collect opinions from many sources, including employees, customers, partners, and other stakeholders, to have a comprehensive view of the current situation of the business. Based on the collected data, analyze and adjust future development strategies.
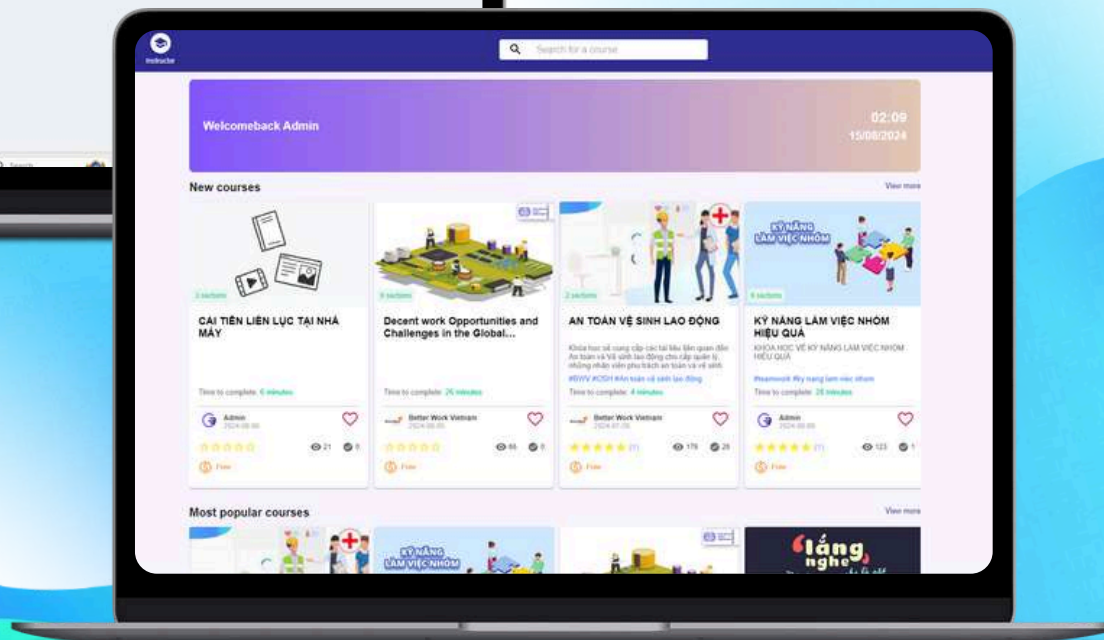

03 Capacity Building & Learning

✳ Instructors can design courses for specific audiences, fields, or industries.

✳ The system provides in-depth analysis, ranking, and evaluation tools to support effective course performance measurement.

LEARNING CORNER
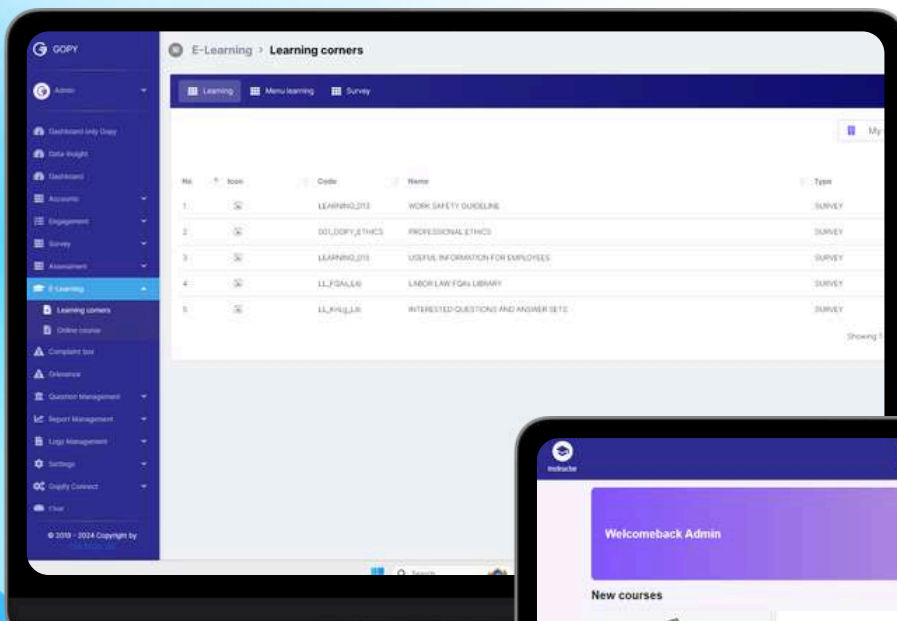

ELEARNING

CSR ecosystem

*makes it easy to create and manage online courses with learning corner and e-Learning.*

03 Capacity Building & Learning

✳ This is an online space for users to connect, seek support from the community, and contribute to the collective knowledge in the Information Library.

HELPDESK

**FORUM**

KNOWLEDGE

CENTER

CSR Ecosystem

An interactive platform where customers and users discuss, share experiences and exchange information about products, services, or related topics through forums and FQAs.
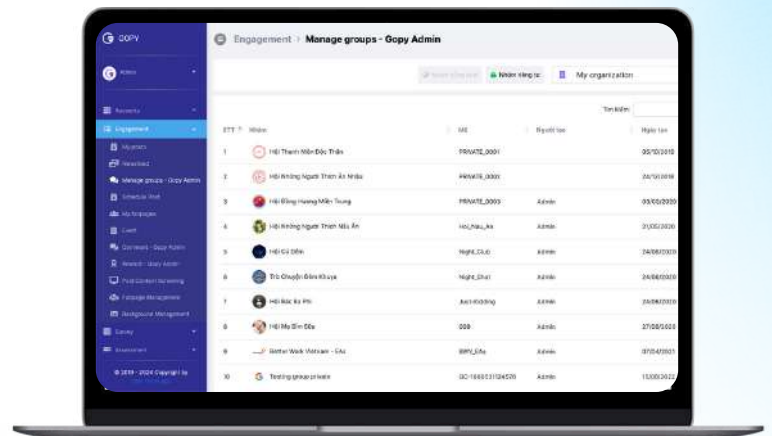

04 Accountability

ACCOUNT MANAGEMENT

Authorization and access control ensure that only authorized users have access to critical resources and information.

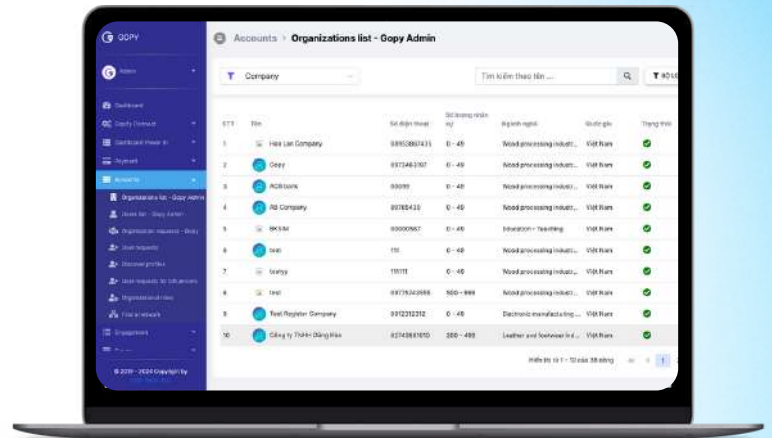

MEMBERSHIP SERVICES

Group members can easily access resources, the latest information, and career, business, or learning opportunities.

CONTENT SCREENING

Businesses and media platforms need to maintain their credibility and reputation. Content moderation helps ensure that information shared on the platform is accurate, trustworthy, and valuable, avoiding the spread of misinformation.
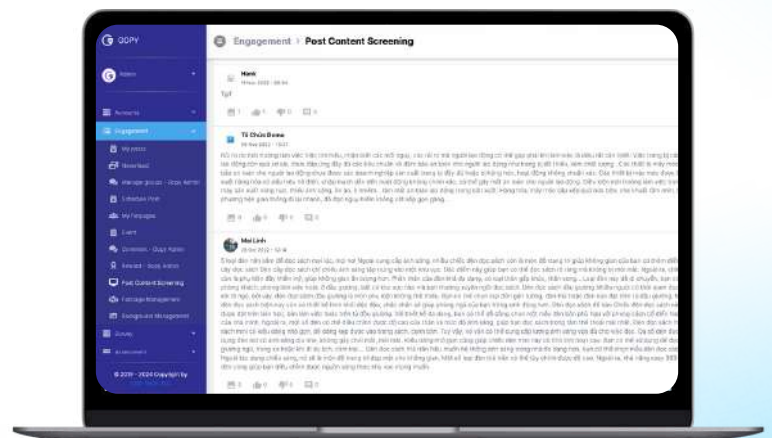

DATA REPORTING

Helping businesses integrate information management and data analytics processes effectively. Ensuring flexibility and ease of use through intelligent features and customizable interfaces.
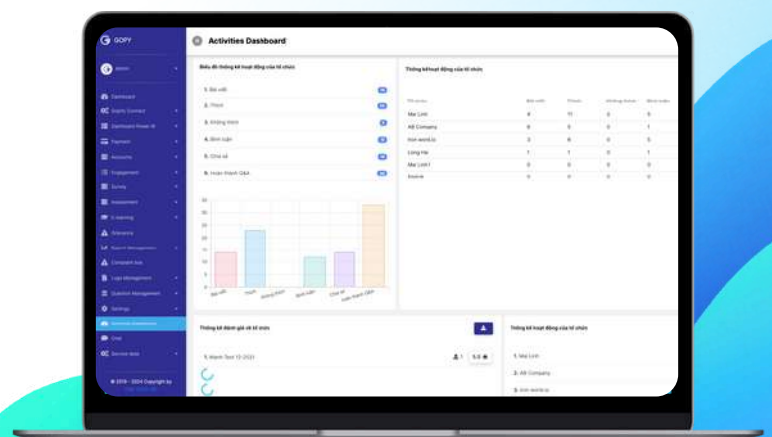

INTERNAL COMMUNICATION

Connect, discuss, and share internal information directly and easily. Gopy's connection tool also effectively supports internal corporate communications, notifying and issuing corporate regulations and policies quickly and synchronously across the system. Create an open, fair, and transparent internal communication environment.

In-depth Human Resource Management system

GOPIFY HRM+

DEVELOPMENT
- Personal development plan
- Talent assessment
- Building a succession team

PLAN
- Human resource budget
- Human resource planning
- Human resource planning (promotion, transfer)

RETIREMENT
- Employee termination process
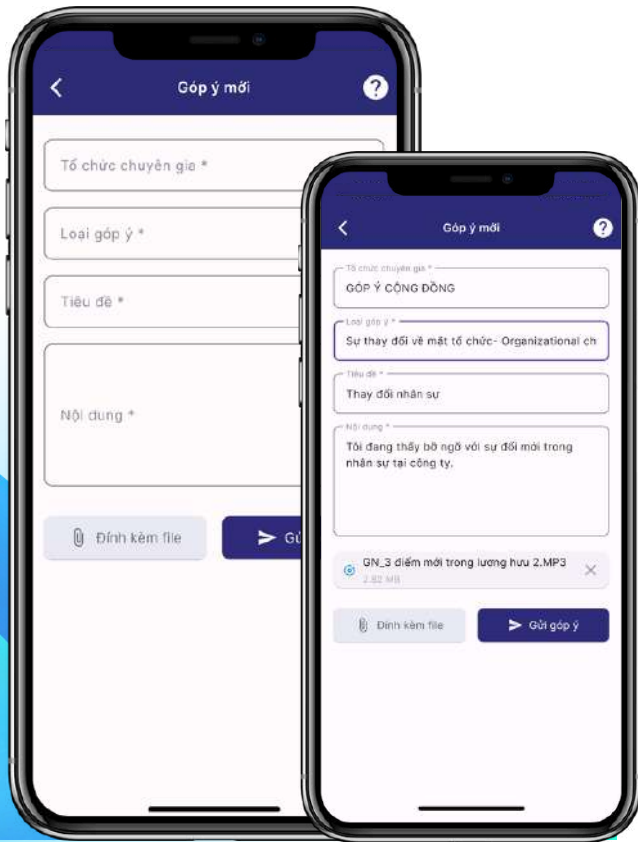

SOLUTIONS CENTER

The comprehensive resource includes guidelines, articles, videos, and tools to assist users in troubleshooting difficulties successfully and fast.

06 Effective Grievance

ANONYMOUS COMPLAINTS BOX

Anonymous complaint submission tool, with complaint reception and handling process according to International Labor Organization (ILO) standards.

GRIEVANCE

MANAGEMENT SYSTEM (GMS)

Gopy's Grievance management system (GMS) is designed to standardize the complaint resolution process, ensuring fairness and transparency for all parties involved.

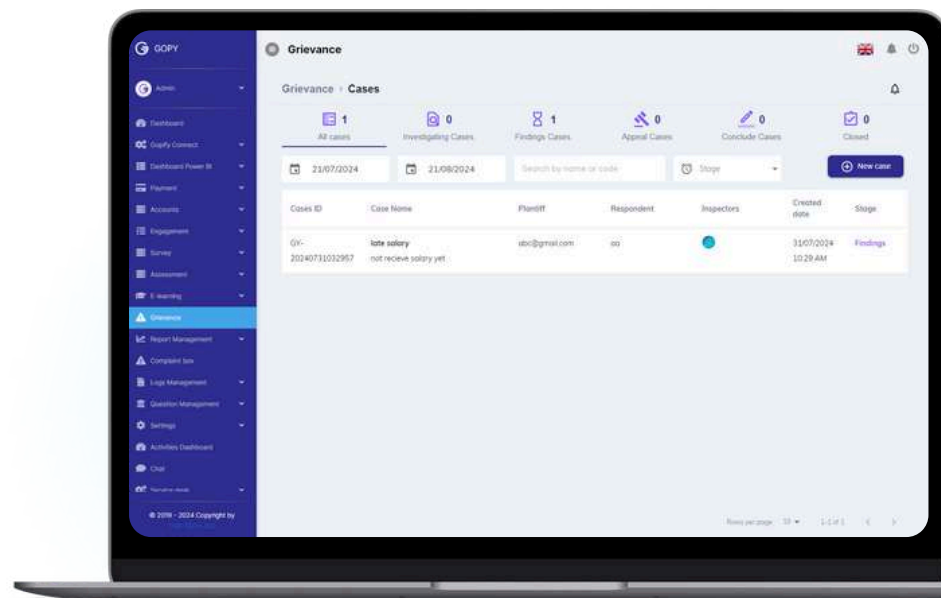

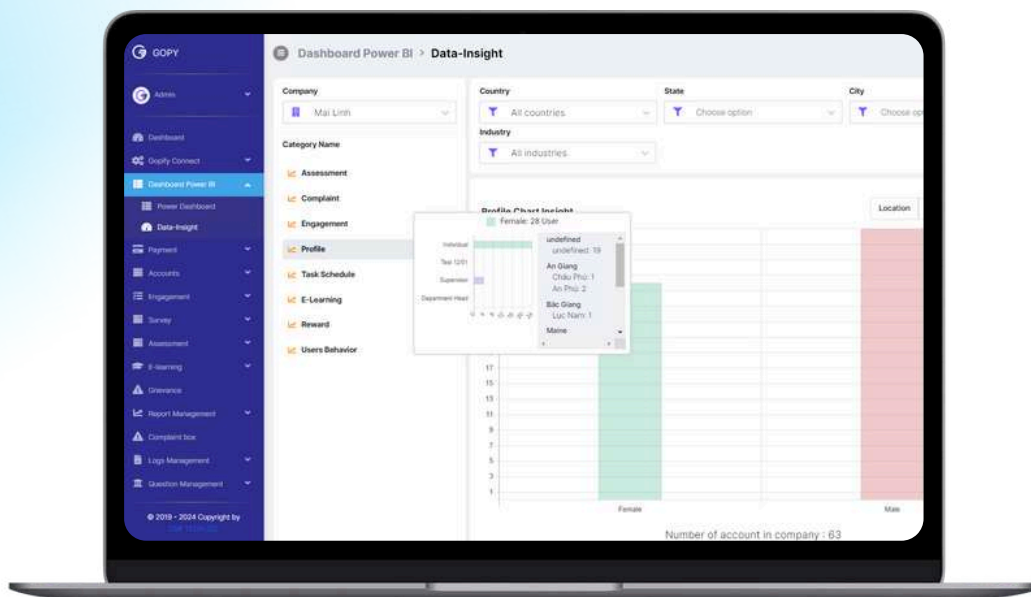

CSR Ecosystem

We provide support to stakeholders by emphasizing that handling complaints is not merely a duty but also a chance for business growth and enhancement.

07 Information historical & Data driven

ACTIVITIES DASHBOARD
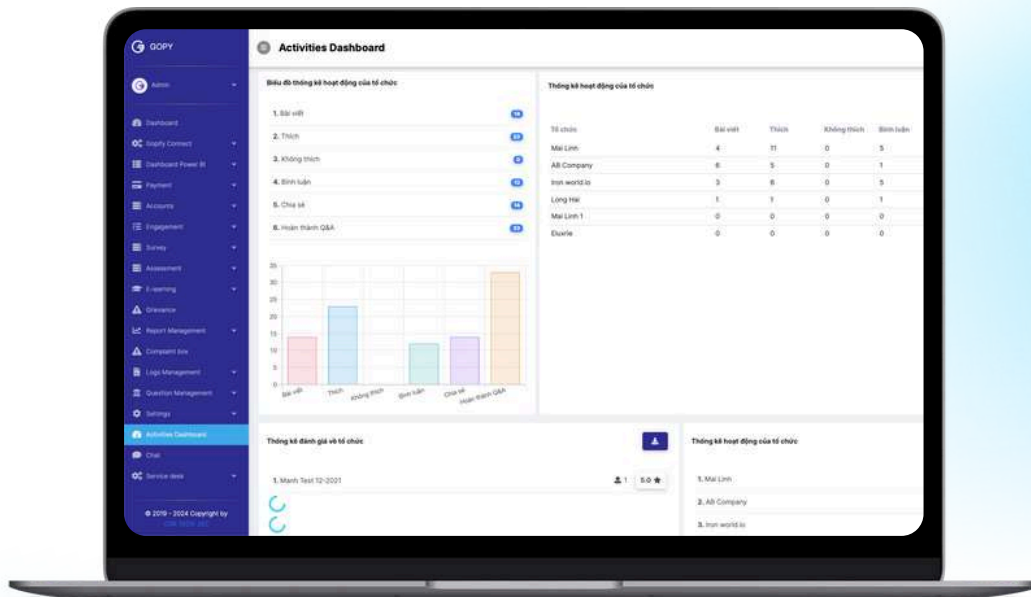

With the Activities Dashboard, businesses can easily monitor and manage activities taking place in the business and access information quickly and accurately.

DATA INSIGHTS

Support businesses to integrate information management processes and analyze data effectively. Ensure flexibility and ease of use through smart features and customizable interfaces.

03
Customers

CSR ECOSYSTEM

The CSR Tech ecosystem is developed with the desire to support Enterprises and Organizations in achieving long-term, sustainable development goals through improving working conditions and environments, building capacity, raising awareness and knowledge for employees, as well as increasing business management efficiency for the community of export manufacturing Enterprises in Vietnam.

OUR PARTNERS

UNDP · KRUGER · VIHEMA · SAITEX · BetterWork Vietnam

VCCI · International Labour Organization

CUSTOMER REVIEWS

VIHEMA
"Gopy is truly a fast and effective support tool in implementing Covid-19 infection risk assessments in the business community in industrial parks across the country."

VCCI
"The Gopy ecosystem helps us get closer to workers. We can provide online training courses for workers in a convenient, easy and transparent way."

BWVN
"Gopy also effectively supports the work of reviewing, improving the effectiveness of policy making, promoting legal compliance, and promoting the completion of regulations."
